

Company Profile

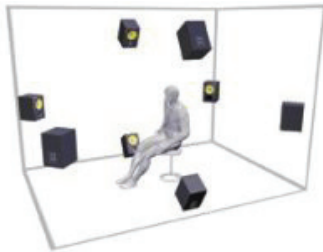

ACOUSTIC FIELD INC is founded April 2007 by Jiro Kubo.
We are independent of Acoustic R&D System division of TIMELORD LTD.

During TIMELORD days (12 years), we have career of the planning and the proposing of Acoustic R&D systems to Japanese well-known companies and universities.

These systems are mainly the audio display using multi channel speaker array or headphone for the advanced research and development of acoustic and auditory, and for the audio simulation of Virtual Reality.

Also we have carrier of 15 years for the professional audio equipment and we sell them to recording studios, broadcastings, halls,etc.

Now we are starting to sell consumer audio & visual products.
